II. Catalog Description

Prerequisite: ACCT 101 – Financial Accounting. In this hands-on course, students will learn to use computerized software to record the transactions of a small to medium-sized business. Topics covered include customer- and vendor-related transactions, end-of-period transactions, payroll, and setting up a new company.
III. Statement of Course Need

A. Computerized accounting is widespread and affordable to even the smallest business, and significantly improves the efficiency in recording, presenting, and interpreting the financial records of the entity. This course provides instruction in a skill that is practical to those who are interested in running their own business, and to accountants who intend to serve this community.

B. A lab component is required because the emphasis of the course is on understanding and practicing the use of the computerized software. Students successfully completing the course will have the skills needed to begin using the software in business applications, and in fact will meet the requirements to sit for an industry-recognized certification exam.

C. This course generally transfers as a business or accounting program requirement or as an elective dependent on the transfer institution.

IV. Place of Course in College Curriculum
