II. Catalog Description

Through this course students will learn a step-by-step process of building and implementing marketing campaigns across social media platforms. The top social media platforms will be addressed in terms of marketing power and capabilities. Using marketing theory and technical instruction students will create digital content including photos, video, graphics, and audio that are used in digital marketing. Students will also gain technical skills in using social media analytic tools and the data those tools provide.
III. Statement of Course Need

A. Social media has become an ubiquitous form of communication throughout our students’ lives, creating new communication patterns with implications for our interpersonal relationships, societal standards, and advocacy. Social media platforms and emerging technologies have changed the way people gather, use and share information. Social media specialists communicate with the public through various platforms as they run employers’ social media accounts, and work to build brand reputation. This course creates a foundation of technical knowhow for these forms of communication that will allow for a new certificate in Social Media Specialist to be developed.

B. If course has a lab component, justify the need for the lab. This course relies on digital production equipment to produce content such as videos, photos, and graphics. Social media analytic tools and editing software also need to be accessed on computers.

C. Please describe the transferability of this course.
