I. Basic Course Information

A. Course Number and Title: MATH 151H Calculus I Honors

B. New or Modified Course: Modified Course

C. Date of Proposal: Spring 2020

D. Effective Term: Fall 2020

E. Sponsoring Department: Mathematics and Computer Science

F. Semester Credit Hours: 4

G. Weekly Contact Hours: 5
   Lecture: 3
   Laboratory: 2
   Out of class student work per week: 7

H. Prerequisites: GPA of 3.5 or permission of the instructor; AND Three-and-one-half years of college preparatory mathematics including Trigonometry and a satisfactory score on a placement test or a CLEP test, or grade of C or better in MATH 113 Precalculus II, or MATH 114H Precalculus Honors

I. Laboratory Fees: None

J. Name and Telephone Number or E-Mail Address of Department Chair and Divisional Dean at time of approval:
   Department Chair: Dr. Lori Austin, Lori.Austin@raritanval.edu, x8576
   Divisional Dean: Dr. Sarah A. Imbriglio, Sarah.Imbriglio@raritanval.edu, x8241

II. Catalog Description

Prerequisite: GPA of 3.5 or permission of the instructor, AND Three-and-one-half years of college preparatory mathematics including Trigonometry and a satisfactory score on a placement test or a CLEP test, or grade of C or better in MATH 113 Precalculus II, or MATH 114H Precalculus Honors.

Introductory calculus with a technology-based computer laboratory component. Topics include limits, differentiation, applications of derivatives, integration, the
Fundamental Theorem of Calculus, and logarithmic, exponential, and other transcendental functions as well as the Binomial Theorem and Mathematical
Induction. Calculus application problems from business, the natural sciences and mathematics

III. Statement of Course Need
A. Enrollment History: In the fall 2014 semester we have approximately 184 students who registered for Calculus I.

B. The two-hour lab is standard for all of our Calculus I, II, and III sections. It enables the students to use technology to help them become proficient in the course material.

C. This course is a prerequisite for MATH 152 Calculus II. This course also serves as a math requirement for programs in Biology, Chemistry, Physics, Computer Science, Engineering Science, General Science /Pre-Health Professional, and Mathematics.

IV. Place of Course in College Curriculum
A. This course is a free elective and a Mathematics elective for all programs.
B. This course serves as a General Education requirement in Mathematics.
A. This course meets a program requirement in Biology, Chemistry, Physics, Computer Science, Engineering Science, General Science /Pre-Health Professional, Pre-Medicine & Pre-Pharmacy and Information Systems & Technology A.S., Mathematics and in the Honor’s College Program
C. This course transfers as a first semester honors calculus course. Course transferability: for New Jersey schools go to the NJ Transfer website, www.njtransfer.org. For all other colleges and universities go to their individual websites.

V. Outline of Course Content
A. Limits
1. The Idea of Limits
2. Definitions of Limits
3. Techniques for Computing Limits
4. Infinite Limits
5. Limits at Infinity
6. Continuity
7. Precise Definitions of Limits

B. Derivatives
1. Introducing the Derivative
2. The Derivative as a Function
3. Rules of Differentiation
4. The Product and Quotient Rules
5. Derivatives of Trigonometric Functions
6. Derivatives as Rates of Change
7. The Chain Rule
8. Implicit Differentiation
9. Derivatives of Logarithmic and Exponential Functions
10. Derivatives of Inverse Trigonometric Functions
11. Related Rates

C. Applications of the Derivative
   1. Maxima and Minima
   2. Mean Value Theorem
   3. What Derivatives Tell Us
   4. Graphing Functions
   5. Optimization Problems
   6. Linear Approximation and Differentials
   7. L'Hôpital's Rule
   8. Newton’s Method
   9. Antiderivatives

D. Integration
   1. Approximating Areas Under Curves
   2. Definite Integrals
   3. Fundamental Theorem of Calculus
   4. Working with Integrals
   5. Substitution Rule

E. Applications of Integration
   1. Velocity and Net Change
   2. Regions Between Curves

F. Enrichment and proofs
   1. Introduction to proofs
   2. Direct proofs
   3. Proofs by contradiction (Indirect proofs)
   4. Proofs by contraposition

VI. Applications problems from business and the natural sciences

VII. Educational Goals and Learning Outcomes

A. General Education Learning Outcomes

   At the completion of the course, students will be able to:

   1. evaluate various limits. (GE-NJ 2)
   2. utilize the concept of instantaneous rate of change to solve problems in physics, biology, economics, and other real-world phenomena. (GE-NJ 2)
   3. differentiate polynomial, rational, exponential, logarithmic, and trigonometric functions algebraically. (GE-NJ 2)
4. demonstrate the relationship between the algebraic and geometric properties of the derivative. (GE-NJ 2)
5. use the Fundamental Theorem of Calculus and the concept of antiderivative to algebraically evaluate integrals. (GE-NJ 2)
6. utilize the derivative procedure to solve various application problems. (GE-NJ 2)
7. prove selected theorems appropriate to the level of the course. (GE-NJ 2)

B. Course Learning Outcomes

See above

C. Assessment Instruments

A. tests
B. final examination
C. projects
D. laboratory products
E. quizzes

VIII. Grade Determinants

Factors that may enter into the determination of the final grade:

A. Tests
B. Quizzes
C. Cumulative final examination
D. Projects
E. Homework
F. Small Groups

Primary formats, modes, and methods for teaching and learning that may be used in the course:

A. lecture
B. small groups
C. labs with technology component
D. homework
E. quizzes
F. projects
G. tests
H. cumulative Final Examination
I. individual teacher determinants
IX. Texts and Materials

   Please Note: The course outline is intended only as a guide to course content and resources. Do not purchase textbooks based on this outline. The RVCC Bookstore is the sole resource for the most up-to-date information about textbooks.

B. A graphing calculator may be required; TI-84 is recommended

X. Resources

This course is held in a computer lab for two hours a week. The computers need to be installed with the calculus software currently licensed to the math department. Contact the math department chair to determine which software to install.
